Hey Amy,

Compiled all the comments in Question Tracker from 5/1/17 onward. Let me know if there's anything you'd like me to fix in terms of the formatting or presentation.

Thanks!

Hey Amy,

I don't mind at all. Already started it, though I think I may be collecting too many details – Is all that is necessary the Q's & A's? I don't mind to continue doing it the way I started (see attachment), but I can also simplify if most of that information isn't really necessary.

Thanks!

**Subject:** Can you help with something?

Hi Greg-

Are you available to help with something? On the main OG sharepoint site [Go to Oil and Natural](#)

[Gas](#) we have our "Question Tracker" housed (Look on left side bar). This was a way to internally track implementation questions coming in so we could maintain consistency of the responses for similar or duplicative questions. This was very active in 2016-late 2017. I don't think folks have been using it recently.....

Can you go in to the question tracker and check to see if there have been any entries from May 1, 2017 onwards? And if so, could you please put these in a word document like the attached example?

Our national regional workgroup lead is trying to get all the historical QAs in one place and this will help close any gap on our end. This isn't urgent.

Let me know if you have any questions.

Thank you,

Amy
